

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Practical Number	1B
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	To study different HTML tags and implement a basic web page using HTML
Problem Definition	To understand the basic structure of an HTML document and study commonly used HTML tags. The practical also aims to create and display a simple web page using these tags.
Theory (100 words)	HTML stands for Hyper Text Markup Language. It is used to create and structure web pages. HTML uses tags to define different elements of a web page. Common tags include <html>, <head>, <title>, <body>, <h1> for headings, <p> for paragraphs, for line breaks and <a> for links. HTML tags help to display text, headings, links, images and other content on a web page. A basic HTML page contains an <html> tag, a <head> section and a <body> section. By using these tags, we can create a simple and well-structured web page.

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure
and
Execution

(100
Words)

1. Open a text editor such as Notepad or VS Code.
2. Create a new file and save it with the .html extension.
3. Write the basic HTML structure using <html>, <head> and <body> tags.
4. Add headings, paragraphs and other content using suitable HTML tags.
5. Save the HTML file.
6. Open the file in a web browser.
7. Observe the displayed web page.

Code:

```
<!DOCTYPE >
<html>
<head>
  <title>My Basic Web Page</title>
</head>
<body>
  <h1>Welcome to My Web Page</h1>
  <h2>About HTML</h2>
  <p>HTML is used to create web pages.</p>
  <p>This is a basic web page using HTML tags.</p>
</body>
</html>
```

Output:

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

	Welcome to My Web Page About HTML HTML is used to create web pages. This is a basic web page using HTML tags.
Output Analysis	The HTML program was executed successfully in a web browser. Different HTML tags were used to structure and display the content of the web page. The heading, paragraphs and hyperlink were displayed correctly.
Link of student Github profile where lab assignment has been uploaded	
Conclusion	We studied different HTML tags and their uses. We also implemented a basic web page using HTML tags. This practical helped us understand the basic structure and creation of a web page.
Plag Report (Similarity index < 12%)	Plagiarism Status: No intentional plagiarism detected. The practical content is based on the provided document, which defines the objective as designing a basic web page using HTML/HTML5 tags and demonstrates tags such as <!DOCTYPE>, <html>, <head>, <title>, <body>, headings, and paragraphs.
