

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Practical Number	1A
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	Introduction to internet (overview of internet, email, www, broadband, FTP)
Problem Definition	To study and understand the basic concepts of the Internet, including its overview, E-mail, World Wide Web (WWW), Broadband, and File Transfer Protocol (FTP).
Theory (100 words)	The Internet is a global network of interconnected computers and devices that communicate using TCP/IP protocols. It provides services such as E-mail, WWW, file sharing and communication. E-mail means Electronic Mail and is used to send messages and files through the Internet. WWW stands for World Wide Web and is a collection of websites and web pages accessed using web browsers. Broadband provides high-speed Internet through fiber, wireless, DSL, cable and satellite technologies. FTP stands for File Transfer Protocol and is used to transfer files between computers. FTP uses two connections: control connection for commands and data connection for transferring files.
